

## Black sticks

1. Make up **six** more calculations that equal **4 4 in blacks**.

*Can you think of a calculation that no one else in the class will have?*

---

2. Choose a **different** number (**in blacks!**), and write down as many calculations as you can for it.

---

**EXT:** Write down **three** calculations that equal **4 4 4 in blacks** *that no one else in the class will have.*

Now choose **one** of these two tasks to work on:

---

**Task A:** Make up some interesting **subtraction** calculations (using black sticks) for someone else to try.

*Remember - you have to work out the answers yourself first!*

---

**Task B:** What are the **even numbers** in blacks?

Explore **other times tables** in blacks... *write down anything interesting that you find out.*

---
